INDUSTRIAL SUPRVALVE™ Operation

- * Two polished CERAMIC DISKS are aligned in an open position to provide full water flow
- * Brass Stops
- * A 1/4 Turn allows the upper disc to close or shear off water flow in a scissor-like action.
- * The ceramic discs are chemically inert and will not react to chemicals and lime.
- * The SUPRVALVE contains no washers or springs.
- * The SUPRVALVE is perfect for all water conditions
- * Ten year limited warranty, against factory defects.
- * Flow rate unrestricted is 6.8 GPM at 75 PSI.

Simple 1/4 turn for full on and full off
